Corresponding Property Tests

In this example, padding and border properties are specified using absolute properties: padding-left, padding-right, padding-top, and padding-bottom, etc. According to the specification, a request for the absolute (top, bottom, left, right) versions of these properties should use the relative ones if they are specified.

In this example, padding and border properties are specified using writing-mode relative properties: padding-before, padding-after, padding-start, and padding-end, etc. According to the specification, a request for the absolute (top, bottom, left, right) versions of these properties should use the relative ones if they are specified.

This block has a start-indent of 1cm and no borders or padding. It has no margin-left set. Here is some more text to fill out the block. Here is some more text to fill out the block.
